EXPERIENCE

LudoPay (Contract, April 2024): A Fintech application which enables users to receive payment in crypto, converting the crypto to cash and do interbank transfer of the fund.

- Coordinated the engineers to ensure a secured and stable system is built
- Worked on the frontend aspect of the web application using React, Antd component library and RTK query.
- Work on the mobile application using React native.
- Deployed servers for the microservices.

Prembly (Fully Remote, 2023): Designed and implemented a sophisticated data driven software for carrying out Identity Verification for business and individuals tailored for Business to Business(B2B) operations. This software also automates human resource(HR) operations from sourcing a talent down to interviewing and verifying the applicants.

- I spearheaded the frontend team while building from scratch the due diligence product which combines the functionality of data verification and human resources operations with React Js, Tailwind, Shadcn component library, RTK Query and React Hook Form.
- I maintained the legacy code of the identity pass product which handles the data and document verification of the individual or business. This legacy code which uses React Redux Saga was improved immensely by rewriting some components and functions which increased the stability of the product by 45%, increased the performance of the system, and improved the user experience of the system by reworking some screens.
- Implemented a pdf component that displays the response generated by the system in a pdf format which enables users to have a copy of the generated response.

Role: Senior Frontend Engineer

FCMB Group(CSL Stockbrokers) 2024: Led a team of engineers on converting the architecture of the trustees software from monolithic to microservices which enables them to connect their software to third party applications like Rova and also integrate their services to FCMB Mobile application.

- Built an FAQ system for internal use.
- Serves as a technical expert representing the company in technical meetings with other companies.
- Demonstrated leadership in managing complex technical transformations in the financial sector

Role: Software Engineer Consultant

Ponpar 2022: Built the company's e-commerce website web application.

- I was responsible for the App's UI/UX, site performance and other technicalities.
- I worked on improving the ease of use of the site.

My Transporter 2021 - 2022:

- I was part of the team of developers who developed the mobile and web versions of the product.
- I was responsible for fixing and modifying the functionalities of the Application after it went live.

SUMMARY

Innovative and results-driven Full Stack Developer with 6+ years of experience in designing, developing, implementing and managing complex web applications and systems. Expert in creating scalable, efficient solutions using modern web technologies. Proven track record of delivering high-performance applications that enhance user experience and meet business objectives.

EDUCATION

Higher National Diploma in Computer Science

Yaba College of Technology

2021 - 2022

📍 Lagos Nigeria.
